

ARAMINE AT WAMPEX 2026 - BOOTH 1A30-A05

Meeting with Aramine at WAMPEX 2026

Journalists are invited to meet the teams at our booth 1A30-A05 (hall 1) to discover the showcased solutions and arrange an on-site discussion.

*To schedule an appointment: Anaïs Lorillu, Communication Manager
alorillu@aramine.com - +33 (0)7 82 14 03 97*

Aramine, a French company with global reach and a leading player in underground mining, will participate in WAMPEX 2026, taking place from **June 3 to 5, 2026**, at the La Palm Royal Beach Hotel in **Accra, Ghana**. At this major West African mining exhibition, Aramine will showcase its latest innovations and solutions for underground mining.

Visitors will be able to meet the Aramine team in **Hall 1, Booth 1A30-A05**. Aramine will exhibit alongside its **subsidiary based in Burkina Faso**, strengthening its regional presence and reaffirming its commitment to supporting mining operations across West Africa.

Specializing in **small and medium underground cross-sections**, Aramine designs, manufactures, and deploys **hard rock mining loading and transport machines** worldwide, recognized for their robustness, productivity, and adaptability to constrained environments.

In addition to its machinery manufacturing activities, Aramine will also highlight its **distribution activities in West Africa**, representing leading brands such as **Astec Industries** and **Atlas Copco**. This offering complements its comprehensive portfolio and reinforces its ability to provide complete solutions tailored to regional mining needs.

Aramine also offers a major range of **multi-brand spare parts**, with an especially broad selection of components adaptable to underground equipment from various manufacturers. This range, available online at shop.aramine.com, provides operators with a responsive, alternative, and operational solution to secure their operations.

By participating in WAMPEX 2026, Aramine reaffirms its ambition: to support mining stakeholders in achieving safer, more productive, and more sustainable underground mining by combining technological innovation, field expertise, and comprehensive services.

About Aramine

A leading player in underground mining for over 50 years, Aramine designs and manufactures innovative machines for more responsible mining. Specializing in narrow veins, the company is a pioneer in battery-powered machines, including electric loaders such as the L140B (1.3 t) and L440B (4.8 t). In parallel, Aramine offers one of the market's most extensive ranges of spare parts under the SmartParts® brand. This expertise is complemented by on-site services worldwide (audit, training, maintenance, commissioning) and machine remanufacturing, giving equipment a second life. A family-owned company based in Aix-en-Provence, Aramine operates in 88 countries and has three subsidiaries worldwide.
